Subject: RE: Preliminary screening model for air impacts from Smelter near Kalispel Reservation

---

Thanks Ken.

I noticed that the MS application is incomplete – it's missing the modeling analyses and it doesn't include any of the modeling results tables in the application itself.

I'll see if Bryan can track those down for us and I'll have him forward them to you if he can find them.

Dave

Hi Dave,

Yes for sure more info is needed. Here are some documents on the Mississippi Silicon plant which Bryan Holtrop of your staff found earlier and a draft impact statement for a new facility in Iceland. I will send you the Spokane Tribe's Class 1 Airshed Redesignation submittal document with the next email for your records.

Thanks --Ken

Thanks Ken.

Interesting stuff.

If we do end up doing some screening modeling, our modeler will need to get some more detailed information from the company (or Ecology if they've got something from the company yet).

Look forward to talking more soon.

Dave

FYI- Attached is some info on the smelter project sent to us by the project proponent. PM numbers are omitted for some reason --Ken

Subject: Preliminary screening model for air impacts from Smelter near Kalispel Reservation

Hi Wenona,

Thank you for your time today, and as we discussed, the Tribe needs to understand how the proposed smelter might impact the home of the Kalispel people and understand how a redesignation of the Tribes airshed to Class 1 might affect the PSD permitting outcome and the Tribe's air quality. If there were a way that EPA could help to do some screening modeling, we think it would help the Kalispel develop the capacity to best protect our right to clean air on the reservation.

Thanks for the consideration --Ken
